## BitNet Technologies

Founder

January 2013 - Present (11 years 1 month)

Nigeria

## Tectah

Back End Developer

August 2022 - November 2022 (4 months)

Manchester, England, United Kingdom

- Single handedly built an E-commerce (Food Application) Api Backend for the organisation using .Net core 6.0 up to 70% of the entire project and api backend.
- Designed RESTFUL APIs in projects using .NET technologies by shouldering 70% of the back-end responsibility.
- Created a responsive and maintainable Food E-commerce application using .NET technologies.
- Collaborated with a team of eight in code review and resolving technical issues on other project of the company thereby improving the code quality by 50%.
- Managed and coordinate the back-end logics with members of the team on a weekly basis
- Technologies and Packages used: Dapper ORM, Rest Api, .Net Core 6.0, Sql, Mssql, Serilog, FluentValidation, Automapper, Nlog, RestSharp, BCrypt etc.

## AstraTech Nigeria

Full Stack Engineer

October 2018 - December 2020 (2 years 3 months)

Ibadan, Oyo State, Nigeria

- Collaborated with a teams of four in develop database and backend of a school management system with cbt exam system.
- Collaborated with a teams of two in developing a departmental admin system with payment integrations shouldering 45% of the back-end responsibility.
- Designed RESTFUL APIs in projects using .NET technologies by shouldering 40% of the back-end responsibility.
- Created a responsive and maintainable financial application with a team of four using .NET technologies.
- Participated in agile practices with a team five.
- Collaborated with a team of four in code review and resolving technical issues thereby improving the code quality by 40%.
- Trained over 150 new students on getting started with programming as well as helping them understands the basic of programming using C# technologies
- Managed and coordinate the back-end logics with a team on a weekly basis

#### Astratech NG

Software Developer/Software Instructor

November 2018 - November 2020 (2 years 1 month)

Ibadan, Oyo, Nigeria

- Monitored and updated back-end data by inter-communicating between frontend and server side.
- Consulted with engineering team members to determine system loads and develop improvement plans.
- Trained over 200 Siwes (student industrial workshop scheme) students to become a back end software developer using C# and Vb.net.
- Strengthened developmental methodologies by introducing agile code quality documents.
- Collaborated with developers and performance engineers to enhance supportability and identify performance bottlenecks.
- Support and Implemented student departmental portal for a department at Polytechnic Ibadan.

#### IntTeck Technologies

Developer/Support Officer

February 2017 - October 2017 (9 months)

Nigeria

- Provided support for Global Insurance Business Solution (GIBS) of Guinea Insurance, Consolidated Hallmark Insurance and Staco Insurance.
